U.S. Patent and Trademark Office PTO-303 (Rev. 04-01)

The applicant has amended claim 1 that rasises new issues ("of the holding case") that requires further consideration and/or search.

The applicant has also argued that the granule size a mere matter of design choice and not a matter of surface area and volume relative to radiation and conduction rates. The applicant has stated on page 4 of the specification that the size of granules is prior art and has not yet provided the examiner that prior art and since the applicant has not provided criticality of the size of the granules in the specifications it can be considered a design choice.

it has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. Ex parte Masham, 2 USPQ2d 1647 (1987).
